

<b>Context project:</b>	Programming Life		
<b>Group:</b>	3		
<b>User Story</b>	<b>Task</b>	<b>Assigned To</b>	<b>Estimated effort (1-5)</b>
<i>Developers need to have good information to help them develop the application</i>	Setup tools (Like Slack, Git, Travis-CI, Findbugs, Checkstyle, Octopull, etc.)	Tom	3
<i>Stakeholders need to have a clear understanding of what is going to be developed</i>	Construct a draft for the Product Vision	All (head: Boris)	5
<i>Developers need to have sufficient plans to fuel construction of the application</i>	Create a product backlog	Boris	2
<i>Users need to be able to supply data for the application to read</i>	Create a parser for genome data	Sam	4
<i>Users need to be able to see a first representation of the read data</i>	Look for a library to display graph information	Kasper/Mathieu	2
	Create a first visual component so data can be displayed	Kasper/Mathieu	3
<i>Stakeholders and Developers need to have a clear view of how the application is going to look</i>	Construct a design document outlying a basic setup for the application	All (head: Boris)	5
