Sprint plan #8 revision

Context project: Programming Life

Group: 3

- **Notes explaining the actual outcome:**
  We have implemented some new features this week, like the implementation of the parsing of the new annotation format (gff), but most tasks where fixes and finetuning of already implemented features and documentation tasks.
- **A description of main problems encountered and the reaction implemented to face them:**
  - The reports took more time then expected. Our reaction was to skip or postpone some of our tasks.
  - Some tasks where done by other people then planned, while it was not always communicated propperly, which resulted in a task being done twiche by two differnt people
